

SAMMY MURUGU
IT TECHNICAL SUPPORT ENGINEER

Sammymurugu07@gmail.com[0719428518](tel:0719428518) www.linkedin.com/in/sammymurugu

PROFESSIONAL SUMMARY

Results-driven Network Engineer with over 3 years of experience in enterprise networking, technical support, systems integration, and infrastructure deployment across telecom and enterprise environments. Skilled in designing, implementing, troubleshooting, and optimizing LAN/WAN, WLAN, VPN, and network security solutions. Experienced in configuring routers, switches, wireless access points, and firewalls while ensuring high system availability and SLA compliance. Strong understanding of routing protocols including OSPF, EIGRP, and BGP, with hands-on experience supporting hybrid IT environments and enterprise clients. Adept at technical documentation, project support, incident management, and customer engagement.

PROFESSIONAL EXPERIENCE

IT Technical Support Intern| Ministry of Lands| Jan 2026- Current

- Provide technical support for hardware, software, and enterprise network issues across ministry departments.
- Support LAN/WAN infrastructure, Wi-Fi connectivity, DNS, and internet services.
- Assist in software deployment, configuration, patch management, and cybersecurity implementation.
- Support backup and disaster recovery procedures for ministry systems and files.
- Participate in ICT projects, system upgrades, and cybersecurity awareness initiatives.
- Maintain ICT asset inventory, documentation, and software licensing records.
- Support video conferencing systems, meeting room technology, and user onboarding.

Network Support Engineer| Airwave Infinity Technologies| June 2025- Nov2025

- Delivered enterprise network and infrastructure support ensuring high availability of customer systems and services.
- Configured and supported routers, switches, wireless access points, VPN connectivity, and enterprise applications.
- Diagnosed and resolved routing, connectivity, DNS, latency, and wireless network issues within SLA timelines.
- Supported infrastructure upgrades, deployments, and rollout of new technologies with minimal downtime.
- Performed proactive monitoring, preventive maintenance, and root cause analysis to improve network stability.
- Produced technical documentation including SOPs, implementation reports, incident reports, and network diagrams.
- Collaborated with clients and internal teams to resolve technical issues and improve service delivery.

Freelance Network Engineer | Jan 2025-June 2025

- Designed and deployed LAN/WAN infrastructure, VLANs, wireless networks, and VPN solutions for SMEs.
- Installed and configured routers, switches, access points, and end-user devices.
- Diagnosed and resolved network outages, connectivity issues, and hardware/software faults.
- Advised clients on network optimization, cybersecurity improvements, and infrastructure upgrades.
- Supported deployment of new systems, software installations, and user onboarding activities.

Network support Engineer| Datacomm systems & solutions| Sept 2022- Dec 2024

- Supported enterprise network infrastructure operations, end-user systems, and technical support services.
- Improved incident response efficiency by 30% through proactive monitoring and troubleshooting.
- Maintained 99.8% system uptime by identifying and resolving infrastructure issues before service disruption.
- Assisted in deployment projects, upgrades, disaster recovery readiness, and change implementation activities.
- Monitored network performance, bandwidth utilization, and infrastructure health to ensure SLA compliance.
- Generated technical reports, implementation documentation, and recommendations for infrastructure improvements.
- Worked closely with vendors, cross-functional teams, and stakeholders to support project delivery.

Intern ICT Officer | Rift Valley Regional commissioner Office| June 2022-August 2022

- Enterprise IT Support & Operations Delivered daily ICT support services, ensuring system availability and seamless access to enterprise applications for end users.
- Fiber Optic Monitoring & Fault Resolution (NOFBI) Conducted real-time fiber monitoring, power level analysis, and fault localization using OTDR, OPM, and VFL, enabling faster fault detection and reducing link downtime by 40%.
- Network Monitoring & Reporting Monitored network performance and generated monthly reports, providing insights that improved network efficiency by 25% through data-driven recommendations.

CERTIFICATIONS

- HCIA | HCIP Security
- NSE 1,2,3-fortinet
- CCNA1,2,3| CCNP
- Software Testing- PLP
- Cybersecurity
- Linux essentials
- DHSA surveillance

TECHNICAL SKILLS

- Monitoring & Planning tools: Ubiquiti Airlink, Planner, Netspot, Putty, Wireshark.
- Routing Protocols: OSPF, EIGRP, BGP
- Networking: LAN/WAN, TCP/IP, VLANs, VPN, DHCP, DNS, NAT, Subnetting
- Hardware: Cisco routers/switches, Fortinet firewalls, Access Points
- Network Security: Firewalls, IDS/IPS, ACLs, VPNs, Port Security, Endpoint Protection
- Linux proficiency
- Cybersecurity: Information gathering, Wireless application exploitation
- IT Support: Troubleshooting of hardware/software

EDUCATION

- BSc Information Communication Technology
Laikipia University (Sept 2018- Dec 2022)
- Kenya Certificate of Secondary Education
Kapcheplanga Secondary (Jan 2014-Dec 2017)

ADDITIONAL INFORMATION

- **Graphic Design:** Skilled in creating digital graphics, posters, logos, and social media content using, Canva and Illustrator. Designed marketing assets and visuals to support internal and client projects
- **Software Testing:** Knowledgeable in functional testing, test case design, bug reporting, and using tools like Jira, Selenium.
