

SAMMY MURUGU
IT TECHNICAL SUPPORT ENGINEER

Sammymurugu07@gmail.com[0719428518](tel:0719428518) | www.linkedin.com/in/sammymurugu

PROFESSIONAL SUMMARY

Results-oriented Network Support & Technical Support Engineer with over 3 years of experience supporting enterprise networks, telecommunications infrastructure, and mission-critical ICT systems. Experienced in providing Level 2 technical support, incident management, root cause analysis, preventive maintenance, enterprise customer support, and SLA-driven service delivery. Skilled in troubleshooting LAN/WAN, VPN, DNS, routing, switching, wireless, and firewall environments while collaborating with Level 3 support teams. Strong background in network monitoring, technical documentation, automation using Python scripting, and continuous service improvement.

TECHNICAL SKILLS

- Level 2 Technical Support
- Enterprise Customer Support
- Incident & Problem Management
- Root Cause Analysis
- Preventive Maintenance
- Service Availability Management
- Network Monitoring
- Capacity Planning
- Technical Documentation
- SLA Compliance
- Escalation Management
- Network Performance Reporting
- Customer Communication
- Automation & Scripting
- Linux Administration

PROFESSIONAL EXPERIENCE

IT Technical Support Intern| Ministry of Lands| Jan 2026- Current

- Provide technical support for hardware, software, and enterprise network issues across ministry departments.
- Support LAN/WAN infrastructure, Wi-Fi connectivity, DNS, and internet services.
- Assist in software deployment, configuration, patch management, and cybersecurity implementation.
- Support backup and disaster recovery procedures for ministry systems and files.
- Support Microsoft windows environment, Microsoft office applications and Microsoft 365 tools
- Provided technical support for virtual and hybrid meetings using Microsoft Teams and Zoom.
- Participate in ICT projects, system upgrades, and cybersecurity awareness initiatives.
- Maintain ICT asset inventory, documentation, and software licensing records.

Network Planning & Optimization| Airwave Infinity Technologies| June 2025- Nov2025

- Delivered Level 2 enterprise network support.
- Performed root cause analysis and permanent fault resolution.
- Collaborated with Level 3 engineers on complex incidents.
- Monitored network capacity and produced technical documentation

Freelance Network Engineer | Jan 2025-June 2025

- Designed and deployed LAN/WAN infrastructure, VLANs, wireless networks, and VPN solutions for SMEs.
- Installed and configured routers, switches, access points, and end-user devices.
- Diagnosed and resolved network outages, connectivity issues, and hardware/software faults.
- Advised clients on network optimization, cybersecurity improvements, and infrastructure upgrades.
- Supported deployment of new systems, software installations, and user onboarding activities.

Network support Engineer| Datacomm systems & solutions| Sept 2022- Dec 2024

- Supported enterprise network infrastructure operations, end-user systems, and technical support services.
- Improved incident response efficiency by 30% through proactive monitoring and troubleshooting.
- Maintained 99.8% system uptime by identifying and resolving infrastructure issues before service disruption.
- Assisted in deployment projects, upgrades, disaster recovery readiness, and change implementation activities.
- Monitored network performance, bandwidth utilization, and infrastructure health to ensure SLA

compliance.

- Generated technical reports, implementation documentation, and recommendations for infrastructure improvements.
- Worked closely with vendors, cross-functional teams, and stakeholders to support project delivery.

Intern ICT Officer | Rift Valley Regional commissioner Office| June 2022-August 2022

- Enterprise IT Support & Operations Delivered daily ICT support services, ensuring system availability and seamless access to enterprise applications for end users.
- Fiber Optic Monitoring & Fault Resolution (NOFBI) Conducted real-time fiber monitoring, power level analysis, and fault localization using OTDR, OPM, and VFL, enabling faster fault detection and reducing link downtime by 40%.
- Network Monitoring & Reporting Monitored network performance and generated monthly reports, providing insights that improved network efficiency by 25% through data-driven recommendation

CERTIFICATIONS

- HCIA | HCIP Security
- Cisco Ethical Hacker
- CCNA1,2,3| CCNP
- Software Testing- PLP
- Cybersecurity
- Linux essentials
- Fortinet associate cybersecurity

EDUCATION

- BSc Information Communication Technology
Laikipia University (Sept 2018- Dec 2022)
- Kenya Certificate of Secondary Education
Kapcheplanga Secondary(Jan 2014-Dec 2017)

Projects

- Python Network Monitoring System: Developed a Flask-based monitoring solution to collect CPU, memory, bandwidth and uptime metrics, visualize network performance, and generate alerts using Python automation.

ADDITIONAL INFORMATION

- **Graphic Design:** Skilled in creating digital graphics, posters, logos, and social media content using, Canva and Illustrator. Designed marketing assets and visuals to support internal and client projects
- **Software Testing:** Knowledgeable in functional testing, test case design, bug reporting, and using tools like Jira, Selenium.
